

I am adamantly opposed to "Ringless Voicemail". This should be outlawed, or at the very minimum subject to there Do Not Call list. Our voicemail will be filled with these annoying messages, and we will miss important messages from friends and family. Also, my voice mail system does not provide a "delete" function until after a message has been listened to. Also, it takes time to go through voicemail messages one by one, and delete the "spam" messages. PLEASE STOP THIS MADNESS !
